

Computer Studies, Chapter 9 – Working with Array and String

Exam Oriented MCQs, 9.1 Introduction

Q-1: Which of the following is a variable representing a collection of homogeneous type of elements?

- A. Method B. Object ~~C. Array~~ D. Class

Q-2: Which kind of variables are of basic data types and can store only one value at a time?

- A. Array variables B. 1-D variables C. 2-D variables ~~D. Scalar variables~~

Q-3: Which of the following are useful to represent vector, matrix and other multi-dimensional data?

- A. Vectors ~~B. Arrays~~ C. Matrix D. Objects

Q-4: Which of the following can be represented by Arrays?

- A. Vector B. Matrix C. Multi-dimensional data ~~D. All A, B & C~~

Q-5: Which of the following is a one-dimensional data structure?

- A. Matrix ~~B. Vector~~ C. Class D. Method

Q-6: Which kind of information can be stored in 1-D?

- A. Characters B. Numbers ~~C. Both A & B~~ D. Matrix

Q-7: Which of the following is used to represent two-dimensional data structure?

- ~~A. Matrix~~ B. Vector C. Object D. Class

Q-8: Which kind of information can be represented by 2-D data structure?

- A. Characters & Numbers B. Vectors C. Objects ~~D. Tables~~

Q-9: Which of the following are useful when some operations are to be performed on various elements of the similar type?

- A. Class ~~B. Arrays~~ C. Object D. Methods

Q-10: In which manner, all the elements of an array are stored in memory storage space?

- A. Random B. Separated ~~C. Contiguous~~ D. Any of A, B & C

Q-11: Which of the following is used to identify each element of Array variable?

- A. Character B. Number ~~C. Index position~~ D. String

Q-12: How many steps are there for creating an array?

- A. 1 ~~B. 2~~ C. 3 D. 4

Q-13: Which of the following steps are used to create an array?

- A. Declare an array object B. Create an array object C. Both A & B D. Specify the size

Q-14: How many ways are there to create an array object?

- A. 1 ~~B. 2~~ C. 3 D. 4

Q-15: Which of the following ways are used to create an array?

- A. Using new operator and specifying size B. Directly initializing the content of array
C. Both A & B D. Declare an array object

9.2 1-D Array

Q-16: What is array with single dimension known as?

- A. Matrix B. 2-D C. Both A & B ~~D. 1-D~~

Q-17: Which of the following can be seen as a collection of one or more scalar variables?

- A. Matrix ~~B. Vector~~ C. Data type D. Object

Q-18: What can be declared in place of individual variables like marks1, marks2, marks3, marks4, marks5?

- A. ~~marks[5]~~ B. marks[0-5] C. marks[1-5] D. marks[0-4]

Q-19: What is used to declare a 1-D array? OR

Q-19: In Java, how can be array elements accessed using index for each dimension?

- A. { } ~~B. []~~ C. () D. < >

Q-20: Which is the proper syntax of declaring a 1-D array?

- A. <data type> <array name> []; B. <data type> [] <array name>;
C. Both A & B D. <array name>

Q-21: Which of the following is/are proper example/s of an array?

- A. int marks[] = new int[5]; B. int [] marks = new int[5];
C. Both A & B D. marks[];

Q-22: In Java how many bytes storage spaces are occupied by integer datatype?

- A. 10 B. 6 C. 2 ~~D. 4~~

Q-23: How many bytes are occupied by new int[5];?

- A. 20 B. 10 C. 5 D. 4

Q-24: What is used to refer an element of an array?

- A. { } B. Array content
C. Index or subscript D. Element reference

Q-25: Which of the following specifies the position of an element in an array?

- A. Array content B. Index
C. Reference variable D. Datatype

Q-26: From which value Index start?

- A. 0 B. 1 C. 2 D. 3

Q-27: If 'int marks[] = {1,2,3,4,5};' is defined in Java then what will be the value of marks[3]?

- A. 2 B. 4 C. 3 D. 5

Q-28: Which of the following contains reference to memory location where the array elements are stored?

- A. Square brackets B. Datatype C. Memory location D. Array name

Q-29: What is used as a separator of 1-D array values?

- A. ; (Semi colon) B. + (plus) C. , (Comma) D. - (Hyphen)

Q-30: Which brackets are used to represent values of data elements in 1-D array?

- A. { } B. [] C. () D. < >

Q-31: Which of the following is/are the proper example/s of declaring an array with initial values of data elements?

- A. int marks[] = {90, 70, 77}; B. int [] marks = {90, 70, 77};
C. Both A & B D. int marks[90, 70, 77];

Q-32: Which of the following is not a right statement to declare an array named marks in Java?

- A. int marks[] = new int [3]; B. int [] marks = new int [3];
C. int marks[3] = {50, 60, 70}; D. int marks[] = {10,20,30};

Q-33: What will be the index value array if array is initialized with following values?

int marks [] = {70, 80, 85, 90, 100};

- A. 0 to 5 ~~B. 0 to 4~~ C. 1 to 5 D. 1 to 4

Q-34: Which combination is not possible to specify simultaneously, while declaring an array?

- A. Size of dimensions and square brackets ~~B. Size of dimensions and initial values~~
C. Initial values and array variable D. Size of array and square brackets

Q-35: With which values array is initialized, as array is an object?

- A. Class name ~~B. Default values~~ C. Parameters of brackets D. Object name

Q-36: By using which of the following class we can use various static methods provided by Java? OR Sort() and Fill() are methods of which of the following Java class?

- A. Array.java.data ~~B. java.util.Arrays~~ C. util.Array.java D. Array.java.fill

Q-37: Which type of sort will be performed, when we use only array as an argument?

- A. Partial array B. Even elements of array C. Only characters of array ~~D. Entire array~~

Q-38: Which of the following is treated as an object of Array class in Java?

- A. Object ~~B. Array~~ C. Method D. Class

Q-39: Which method is used to sort entire or a part of an Array?

- A. Fill() B. Psort() C. Asort() ~~D. Sort()~~

Q-40: Which kind of sorting is done, when we use only array as an argument?

- ~~A. Sort an entire array~~ B. Sort partial array C. Sort particular fields D. All A, B, C

Q-41: With how many arguments array will sort partially?

- A. 1 B. 2 ~~C. 3~~ D. 4

Q-42: Which three arguments array will sort partially?

- A. Array, 1, 2 ~~B. Array, start, last~~ C. Array, fill, value D. Array, sort, value

Q-43: What is contained by array name?

- A. Reference to memory location ~~B. Constant value~~
C. Variable list D. Method name

Q-44: What is the range of elements for partial sort?

- A. Start to last ~~B. Start to (last - 1)~~ C. Start to end D. End to start

Q-45: In Java, which of the following method calls sort elements of array 'list' from list[1] to list[5-1]?

- A. sort(list) B. java.sort(list) ~~C. java.util.Arrays.sort(list,1,5)~~ D. java.util.sort(list,5)

Q-46: Which method is used to fill the whole or partial array with specified value?

- A. Sort B. Insert ~~C. Fill~~ D. Add

Q-47: How many arguments are required when the "fill" method is invoked?

- A. 3 B. 5 ~~C. 2~~ D. 1

Q-48: Which arguments are required, when the "fill" method is invoked?

- A. Array, start ~~B. Array, value~~ C. Array, last D. Array, fill

Q-49: How many arguments are required to fill array partially?

- A. 1 B. 2 C. 3 ~~D. 4~~

Q-50: Which command is used to assign value 5 to all elements of list array?

- A. Sort (list, 5) B. Sort (list 1, 7, 5) C. fill (list 2, 6, 5) D. Fill (list, 5)

Q-51: Which of the following arguments are required to fill partial array from element to (last-1) with specified value?

- A. Array, fill, start, last ~~B. Array, start, last, value~~
C. Array, start, value, last D. Array, value, start, last

Q-52: Which array class method is used to search an element in an array?

- ~~A. Search()~~ B. binarySearch() C. binary() D. SearchArray()

Q-53: Which of the following search is used to search an element in array by writing our own method?

- ~~A. Linear~~ B. Binary C. Sort D. Find

Q-54: Which method does element by element comparison in a serial fashion?

- A. Binary B. Find ~~C. Linear~~ D. Search

9.3 2-D Array

Q-55: Which arrays are used to store tabular data in the form of rows and columns?

- A. Two dimensional ~~B. 2-D~~ C. Both A & B D. 1-D

Q-56: In which form 2-D arrays store tabular data?

- A. Vectors ~~B. Rows and Columns~~ C. 1-D D. All A, B & C

Q-57: Which of the following are used to declare 2-D array?

- A. Array name and two pairs of [] B. Array type and array name
C. Array name and two pairs of { } D. Array type and two pairs of { }

OR

Q-57: In Java, 2-D array can be declared in which of the following correct way?

- A. `int marks[ ] [ ] = new int [5] [3];` B. `int marks[ ] ( ) = new int (5) (3);`
C. `int marks = new int [5] [3];` D. `int marks( ) ( ) = new int (5) (3);`

Q-58: How many pairs of square brackets are used to declare 2-D array?

- A. 1 B. 4 C. 3 ~~D. 2~~

Q-59: What is the size of second dimension in an array `gseb[5] [3]`?

- A. 5 B. 15 ~~C. 3~~ D. 18

Q-60: In the following statement for declaring two-dimensional array of Java 5 represents What?

`int marks [ ] [ ] = new int [5] [3]`

- A. number of rows B. number of columns
C. array size D. number of bytes

Q-61: Which brackets are used to specify the size of two dimensions row and column respectively?

- A. Parenthesis B. Curly brackets
~~C. Square brackets~~ D. Angular brackets

Q-62: How many integer values will be stored in the following array?

`Int marks[ ] [ ] = new int [4] [4];`

- A. 8 B. 64 ~~C. 16~~ D. 4

Q-63: Which arrays are not supported directly by Java?

- A. Single ~~B. Multi-dimensional~~ C. Tabular D. 2-D

Q-64: Which kind of array can be created by an array of array?

- A. 1-D B. Vector C. Multi-dimensional ~~D. 2-D~~

Q-65: Which of the following is considered as an 'array of 1-D array', in Java?

- A. Vector ~~B. 2-D~~
C. Matrix D. Multi-dimensional

Q-66: Which property of 1-D array is used to know the size of each row?

- ~~A. Length~~ B. Size C. Measure D. Define

Q-67: Which of the following property is used to get the number of elements in 1-D array?

- A. Size B. Length C. Measure D. DefineSize

9.4 Strings

Q-68: Which of the following is a sequence of characters?

- A. Array ~~B. String~~
C. String Buffer D. Alphanumeric value

Q-69: Which of the following can be considered as a string?

- A. 2-D array of string B. Tabular array of string
~~C. 1-D array of characters~~ D. Matrix array of string

Q-70: How many types of strings are supported by Java to use variables which can store strings?

- A. 1 ~~B. 2~~ C. 3 D. 4

Q-71: Which Java classes are used to handle strings?

- A. String and StringBuffer B. String and Buffer
C. Buffer and String.Java D. Strings and Buffer.Java

Q-72: Which of the following will create a String object with no character?

- A. String (char ary[]) B. String (String strObj) C. String (string literal) ~~D. String()~~

Q-73: Which of the following can create a String object with its initial value using any argument?

- A. String () B. String (char ary[], int start, int len)
~~C. String (char ary[])~~ D. String (String strObj)

Q-74: What is used to create a String object using 1-D array argument starting at array[start] with length number of characters?

- A. String(String strObj)
- B. String(string literal)
- C. String(char array[], int start, int len)
- D. String()

Q-75: What is used to create a String object which is same as object specified in argument?

- A. String (String strObj)
- B. String (string literal)
- C. String (char array[], int start, int len)
- D. String

Q-76: What is used to create a String object that refers to the literal specified in argument?

- A. String (String strObj)
- B. String (string literal)
- C. String ()
- D. String (String strObj)

Q-77: Which of the following statement is true to compare the contents of Str1 and Str2?

- A. Str1 = Str2
- B. Str1 != Str2
- C. Str1 (==) Str2
- D. Str1 == Str2

Q-78: In Java, how many bytes are occupied by characters?

- A. One
- B. Two
- C. Three
- D. Four

Q-79: What can we use to save space, if the characters are ASCII?

- A. Array of numbers
- B. Array of ASCII
- C. Array of Index
- D. Array of strings

Q-80: What can we use instead of 'array of characters', to save space?

- A. Array of bytes
- B. Array of numbers
- C. Array of ASCII
- D. Array of strings

Q-81: What can we use with array of bytes as an argument?

- A. Object
- B. Constructor
- C. Class
- D. Method

Q-82: Which of the following are stored in memory?

- A. Numbers
- B. Elements
- C. Literals
- D. None of these

Q-83: Which operator is used to allocate separate memory, when string objects are created and strings are identical?

- A. NewString
- B. StringNew
- C. NewObject
- D. New

Q-84: Which operator can compare two strings?

- A. Compare
- B. =
- C. →
- D. ==

9.5 String Class Methods

Q-85: What can provide methods to compare strings, find length of string, combining strings, obtaining strings, converting strings etc.?

- A. String object B. ~~String class~~ C. String method D. String property

Q-86: Which of the following methods are provided by String class?

- A. Searching for character or patterns in string B. Converting strings
C. Splitting strings D. ~~All A, B & C~~

OR

- A. To compare strings B. Find length of strings
C. Combining strings D. ~~All of these~~

Q-87: Which of the following method does return true if invoking string is same as str?

- A. Boolean equalsIgnoreCase (String str) B. ~~boolean equals (String str)~~
C. int compareTo (String str) D. int compareToIgnoreCase (String str)

Q-88: Which method does return true if invoking string is same as str after ignoring case?

- A. boolean equals (String str) B. int compareToIgnoreCase (String str)
C. int compareTo (String str) D. ~~boolean equals IgnoreCase (String str)~~

Q-89: Which method does return 0 integer if invoking string is equal to str?

- A. boolean equalsIgnoreCase (String str) B. int compareToIgnoreCase (String str)
C. ~~int compareTo (String str)~~ D. boolean equals (String str)

Q-90: In Java, int compare To (String str) method returns which value if invoking string is equal to Str?

- A. ~~0~~ B. >0 C. <0 D. -1

Q-91: Which method does return > 0 integer if invoking string is greater than str?

- A. int compareToIgnoreCase (String str) B. ~~int CompareTo (String str)~~
C. boolean equals (String str) D. boolean equalsIgnoreCase (String str)

Q-92: Which method does return < 0 integer if invoking string is less than str?

- A. int compareToIgnoreCase (String str) B. boolean equalsIgnoreCase (String str)
C. ~~int compareTo (String str)~~ D. boolean equalsIgnoreCase (String str)

Q-93: Which method is same as CompareTo but case sensitive?

- A. boolean equalsIgnoreCase (String str)
- B. boolean equalsIgnoreCase (String str)
- C. int compareTo (String str)
- D. ~~int compareToIgnoreCase (String str)~~

Q-94: Which method does return number of characters in invoking string?

- A. String concat (String str)
- B. ~~int length()~~
- C. char indexAt(int index)
- D. byte [] getBytes

Q-95: Which method does return character at index position from the invoking string?

- A. char indexAt (int index)
- B. String toUpperCase ()
- C. String concat (String str)
- D. int length()

Q-96: Which method does return an array of characters as bytes from invoking string?

- A. ~~byte [] getBytes()~~
- B. void getChars(int targetIdx)
- C. String toLowerCase()
- D. char indexAt(int index)

Q-97: Which method does copy characters of invoking string from fromIdx to toIdx-1 to target array from targetIdx onwards?

- A. byte [] getBytes()
- B. chat indexAt(int index)
- C. ~~void getChars(int fromIdx, int toIdx, char target[], int targetIdx)~~
- D. String toUpperCase()

Q-98: Which method does return a string after appending str with the invoking string?

- A. String toLowerCase()
- B. ~~String concat (String str)~~
- C. String toUpperCase()
- D. byte [] getBytes ()

Q-99: Which method does return a string with all characters of invoking string converted to lowercase?

- A. byte [] getBytes()
- B. String toUpperCase()
- C. ~~String toLowerCase()~~
- D. String concat(String str)

Q-100: Which method does return a string with all characters of invoking string converted to upper case?

- A. int length()
- B. ~~String toUpperCase()~~
- C. String toLowerCase()
- D. byte [] getBytes()

Q-101: 'Length' represents what with array variable?

- A. Attribute of array
- B. Property of array
- C. ~~Both A & B~~
- D. int length()

Q-102: 'Length' represents what with String object?

- A. Attribute B. Property C. Class ~~D. Method~~

9.6 Date Class

Q-103: In which package of Java Date class is available?

- A. java.date ~~B. java.util~~ C. java.array.util D. java.date.util

Q-104: What is provided by Java library in java.util package?

- ~~A. Date class~~ B. String C. Byte size D. Search element

Q-105: Which class encapsulate both date and time?

- A. Now() B. String ~~C. Date~~ D. Arrays

Q-106: Which precision is used by Date class to represent the value?

- A. Minutes B. Seconds ~~C. Milliseconds~~ D. Hours

Q-107: Which method constructs Date object using current system time?

- A. Date (Time) ~~B. Date ()~~
C. long getTime () D. Date (long elapsedTime)

Q-108: Which method constructs Date object using specified time in milliseconds elapsed since January 1, 1970 GMT?

- A. Date() B. long getTime()
~~C. Date (long elapsedTime)~~ D. String toString()

Q-109: Which method returns a string representing data and time of invoking object?

- A. Void setTime(string) ~~B. String toString()~~
C. long getString() D. void string()

Q-110: Which method returns number of milliseconds since January 1, 1970 GMT?

- A. long getTime() B. Date (long elapsedTime)
C. void setTime(long elapsedTime) D. Date()

Q-111: Which method sets new date and time of an object using elapsed time?

- A. Date() B. Date(long Time)
~~C. void setTime(long elapsedTime)~~ D. String toString()

9.7 Calendar Class

Q-112: Which class is provided in java.util package like Date class?

- A. Display B. Search C. Date ~~D. Calendar~~

Q-113: Which class can be used to extract detailed calendar information like year, month, date, hour, minute and second?

- ~~A. Calendar~~ B. Date C. Display D. DisplayCal

Q-114: Which subclass of Calendar class is used in java?

- A. CalendarNew B. Calendar.util ~~C. GregorianCalendar~~ D. Calendar.java.util

Q-115: Which user defined class method is used to display various components of date and time?

- ~~A. Display()~~ B. Date() C. Time() D. Show()

Q-116: Which methods are used to set the value of the field constants of Calendar class?

- A. Get ~~B. Set~~ C. Display D. Show

Q-117: Which constant of Calendar class will return Year of Calendar?

- A. CalYear B. YearOfCal ~~C. YEAR~~ D. CalendarYear

Q-118: Which constant of Calendar class will return Month of Calendar?

- ~~A. MONTH~~ B. Month.calendar C. Calendar.Month D. MonthOfCal

Q-119: Which constant of Calendar class will return Day of calendar month?

- A. Day B. DayOfCal ~~C. DATE~~ D. DATECal

Q-120: Which constant of Calendar class will return same value as DATE?

- A. DAY B. DayOfMonth C. DateOfMonth ~~D. DAY_OF_MONTH~~

Q-121: Which constant of Calendar class will return Hours in 12-hour notation?

- ~~A. HOUR~~ B. HourOfTime C. Hour_Of_Time D. HOUR_Time

Q-122: Which constant of Calendar class will return Hours in 24-hour notation?

- A. HOUR_CAL B. Hour_Of_Time ~~C. HOUR_OF_DAY~~ D. HOUR

Q-123: Which constant of Calendar class will return Minutes?

- A. Minutes ~~B. MINUTE~~ C. Minute_Time D. Minute_Of_Time

Q-124: Which constant of Calendar class will return Seconds?

- A. Seconds B. Seconds_Of_Time C. SECONDS ~~D. SECOND~~

Q-125: Which constant of Calendar class will return AM or PM notation?

- A. HOUR ~~B. AM_PM~~ C. MINUTES D. SECONDS

Q-126: Which constant of Calendar class will return Day number within a week?

- A. DAY B. DAY_WEEK ~~C. DAYS_OF_WEEK~~ D. Day_Of_Week

Q-127: Which constant of Calendar class will return Week number within the month?

- A. WEEK B. WEEK_NO
C. WEEKDAY ~~D. WEEK_OF_MONTH~~

Q-128: Which constant of Calendar class will return Week number within the year?

- ~~A. WEEK_OF_YEAR~~ B. WeekOfYear C. WEEK_MONTH D. WEEK_YEAR

Q-129: Which constant of Calendar class will return Day number in the year?

- A. DayOfYear B. Day_Year C. DAY_OF_YEAR D. DaysOfYear

Q-130: In Java, what type of value is returned when we use get method of Calendar class with constant DAY_OF_YEAR as an argument?

- ~~A. int~~ B. char C. string D. boolean

Q-131: Which number represents first day in DAY_OF_YEAR?

- A. 0 ~~B. 1~~ C. Any A or B D. 100

Q-132: Which number represents January in Month of calendar?

- A. 1 B. 0 C. 11 D. 10

Q-133: Which number represents December in Month of calendar?

- A. 1 ~~B. 0~~ C. 10 D. 11

Q-134: Which number represents AM in AM_PM?

A. 12

B. 1

~~C. 0~~

D. 24

Q-135: Which number represents PM in AM_PM?

A. 0

~~B. 1~~

C. 12

D. 13

Q-136: Which number represents Sunday in DAY_OF_WEEK?

~~A. 1~~

B. 0

C. 6

D. 7

Q-137: Which number represents Saturday in DAY_OF_WEEK?

A. 0

B. 1

~~C. 7~~

D. 6
